Patika/Very good was:

Music in presentations; wine; quizzes; practical information; good instrument for calculating the energy; programmas ieguve un iespēja to pielietot [obtaining of the program and possibility to use it]; everything; Franz - presentation; exercises

Nepatika/Very bad was:

Cool auditorium; so-so, cold; didn't like the place because the light was bad; bad, very dark room; valodas perfekta nezināšana, paša vaina [English language skills insufficient, own fault]; more time to be devoted to training of PHPP; Dieter was hard to understand; too far - hard to see;

Semināra vietas izvēle/Quality of location:

It would be better to use office with car parking area; OK; OK; Excellent; not good; good; good!; OK; OK

Neizskaidrotie jautājumi/Open questions:

How to make energy consumption 0 l/sqm???; so many variables to put in PHPP calculation that it is easy to make mistakes in the result, it would be good to have possibility to consult with specialists in the future using PHPP in own calculations; will be
